

JUNIOR SOLAR SPRINT 2025

Registration is open for the 2025 Junior Solar Sprint, to be held Thursday, April 10, on the campus of Delaware State University in Dover.

The Junior Solar Sprint is part of a national competition where middle school students build and race solar-powered model cars. It is co-sponsored in Delaware by the DNREC Division of Climate, Coastal and Energy and the Delaware Technology Student Association (TSA).

Students are judged on design and portfolio competitions, as well as timed races where they compete against teams from other schools.
