# WE ARE DELAWARE'S FUTURE

Delaware Futures is the only statewide nonprofit solely dedicated to lifting the performance of Delaware students and improving future educational outcomes for students in Delaware through a comprehensive, youth- and family-focused approach.

Delaware Futures supports more than 400 high-school and middle-school students across Delaware annually who typically represent the lowest academic performers in the state. Our students come from diverse backgrounds and are mostly students of color and from low-income families. Many are first-generation college-applicant students raised by single parents.

Our core programming empowers students and families through a holistic approach by integrating academics, mentorship, skill development, conflict resolution, social-emotional learning, community engagement, workforce preparation, and financial support.

By combining structured activities, paid internships, prevention education, and peer support, DF creates a network of programs where young Delawareans thrive in the present and have future prospects within the state.

We support academic achievement and personal development by providing safe after-school supervision, transportation, and twice-weekly statewide tutoring sessions. Our offerings include college preparation, vocational tours, guest lectures, and boot camps on farming, healthcare, and life skills—designed to help teens succeed in all aspects of life and positively contribute to their communities in Delaware.

We also focus on family engagement and support. We provide parents and caregivers financial literacy workshops, mental health support, and stress management sessions. Our programming builds stronger family dynamics by fostering better communication, offering peer interaction opportunities, teaching conflict resolution, and providing positive role models.

# **ENROLL** Today!!!

Our comprehensive program is designed to support students in every aspect of their educational journey. We offer college tours and field trips that provide firsthand experience of campus life and academic environments, helping students make informed decisions about their future. Our application assistance services guide students through the complexities of applying to schools, ensuring they present their best selves. We also provide paid work opportunities and incentives, allowing students to gain valuable experience and financial support. In addition, our wide range of clubs and sports fosters community, teamwork, and personal growth. To help students excel academically, we offer SAT prep courses that equip them with strategies and confidence for success.
